

Fig. S1. Scatter graph comparing the mass estimates calculated for each proxy, from both Maloiy *et al.* (1979) and Alexander's (1983) exponents. The species selected were those specimens with the most limb bones preserved for analysis. Abbreviations: Alex., Alexander (1983); d, diameter; Fe, femur; ; Hu, humerus; l, length; Mal., Maloiy *et al.* (1979); Ta, tarsometatarsus; Ti, tibiotarsus.
